Drug Education Products

The Drug Education Kit is designed for easy use with facsimile drugs arranged in subgroups for quick location and recognition. The attractively designed kit is packaged in a convenient carrying case constructed on molded plastic that protects the contents for travel and opens as an eye catching display.

Special sections of the kit focus on major drugs such as alcohol, inhalants, tobacco, marijuana, club drugs, cocaine, and others. In addition, common household items are displayed to help parents become aware of the use of these items by many adolescents. The Drug Education Kit includes a Drug Education CD.

The Drug Education CD contains thorough information on the drugs and paraphernalia displayed. It includes references, types of various drugs, signs and symptoms of abuse and a brief physical description of each drug. Copies of the Drug Education CD may be ordered separately.
